

Unit 4: Addition and Subtraction on the Number Line

PRACTICE · SET 2

Name: _____ Date: _____

Solve each problem. Write your answer as a number on the line.

1. Start at 30 on the number line. Hop forward 40. What number do you land on?

Answer: _____

2. Start at 58 on the number line. Hop back 6. What number do you land on?

Answer: _____

3. On the number line, how many units apart are 24 and 31? (Find the length of the jump from 24 to 31.)

Answer: _____

4. Start at 45. Jump forward 20, then forward 5 more. What number do you land on?

Answer: _____

5. Start at 90. Jump back 30, then back 4 more. What number do you land on?

Answer: _____

6. A frog starts at 15 on the number line and lands on 42 after one hop forward. How long was the hop?

Answer: _____

7. Start at 63 on the number line. Hop back 8. What number do you land on?

Answer: _____

8. On the number line, what is the length from 12 to 60? (How far apart are they?)

Answer: _____

9. Start at 27. Hop forward 33. What number do you land on?

Answer: _____

10. You are at 80 on the number line. You hop back and land on 65. How long was the backward hop?

Answer: _____

11. Start at 50. Jump forward 10, forward 10, then forward 10 again. What number do you land on?

Answer: _____

12. A jump on the number line starts at 19 and has a length of 25 units going forward. What number does it end on?

Answer: _____
