

True or False

Concept — ANSWER KEY

Is each fact right?

Think: Work out the left side. Does it really equal the right side?

1. Circle True or False. Reason it out — you don't always need to calculate!

1) $11 - 4 = 6$ True / **False**

2) $9 - 8 = 11$ True / **False**

3) $6 + 7 = 11$ True / **False**

4) $3 + 10 = 13$ **True** / False

5) $7 - 5 = 12$ True / **False**

6) $5 \times 3 = 15$ **True** / False

7) $6 \times 3 = 17$ True / **False**

8) $9 \times 12 = 107$ True / **False**

9) $2 + 6 = 7$ True / **False**

10) $7 - 3 = 2$ True / **False**
