

True or False

Concept — ANSWER KEY

Is each fact right?

Think: Work out the left side. Does it really equal the right side?

1. Circle True or False. Reason it out — you don't always need to calculate!

1) $9 \times 3 = 27$ **True** / False

3) $7 + 10 = 17$ **True** / False

5) $12 \times 2 = 26$ True / **False**

7) $2 \times 6 = 12$ **True** / False

9) $8 + 7 = 15$ **True** / False

2) $11 + 11 = 24$ True / **False**

4) $7 + 4 = 11$ **True** / False

6) $8 - 3 = 6$ True / **False**

8) $6 + 2 = 8$ **True** / False

10) $7 \times 4 = 27$ True / **False**
