

True or False

Practice — ANSWER KEY

Compare the two sides by reasoning.

Think: Swapping the order of a sum keeps it equal — but subtraction does NOT.

1. Circle True or False. Reason it out — you don't always need to calculate!

1) $45 + 9 = 47 + 8$ True / **False**

2) $48 + 5 = 50 + 4$ True / **False**

3) $47 + 14 = 14 + 47$ **True** / False

4) $24 + 2 = 2 + 24$ **True** / False

5) $22 + 3 = 3 + 22$ **True** / False

6) $27 - 14 = 30 - 18$ True / **False**

7) $32 - 14 = 33 - 15$ **True** / False

8) $41 + 6 = 43 + 5$ True / **False**

9) $27 - 14 = 30 - 17$ **True** / False

10) $26 + 2 = 2 + 26$ **True** / False
