

True or False

Practice — ANSWER KEY

Compare the two sides by reasoning.

Think: Swapping the order of a sum keeps it equal — but subtraction does NOT.

1. Circle True or False. Reason it out — you don't always need to calculate!

1) $20 + 8 = 22 + 7$ True / **False**

2) $20 + 10 = 22 + 8$ **True** / False

3) $23 - 6 = 24 - 7$ **True** / False

4) $31 + 8 = 33 + 7$ True / **False**

5) $43 - 11 = 46 - 15$ True / **False**

6) $37 + 3 = 39 + 1$ **True** / False

7) $39 - 10 = 44 - 15$ **True** / False

8) $46 - 7 = 51 - 13$ True / **False**

9) $49 - 6 = 52 - 9$ **True** / False

10) $36 - 3 = 39 - 6$ **True** / False
