

True or False

Practice — ANSWER KEY

Compare the two sides by reasoning.

Think: Swapping the order of a sum keeps it equal — but subtraction does NOT.

1. Circle True or False. Reason it out — you don't always need to calculate!

1) $25 + 3 = 3 + 25$ **True** / False

2) $21 + 9 = 23 + 8$ True / **False**

3) $45 + 10 = 47 + 9$ True / **False**

4) $45 - 9 = 46 - 11$ True / **False**

5) $39 + 3 = 3 + 39$ **True** / False

6) $50 - 11 = 52 - 14$ True / **False**

7) $46 - 12 = 50 - 17$ True / **False**

8) $30 + 7 = 32 + 5$ **True** / False

9) $42 + 13 = 13 + 43$ True / **False**

10) $25 + 4 = 4 + 26$ True / **False**
